13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.) *

The current production on this well is 2,000 MCFD from the two Lower Morrow B (Nan-Bet Stray zones) that were perforated at 10,312-325' and 10,330-340' in May 1997 when the well was recompleted uphole from the new abandoned Morrow 'C' zone. After perforating, the tubing gun got stuck while pulling back into tubing and is still there. Hallwood plans to fish this gun with coiled tubing without killing the well in order finish perforating six(6) more Morrow 'A' (10129'-140') and 'B' (10184'-200', 10240'-250', 10254'-262', 10268'-273', and 10284'-296') zones.

Hallwood plans to do this workover during October 1998.
