

15. For the protection of livestock and wildlife, all pits containing toxic liquids shall be fenced and covered with a fine mesh netting (i.e., hardware cloth) with openings being of 1/2 inch or less.
16. All waste associated with the drilling operations shall be (buried within a separate trash pit)(removed and deposited in an approved sanitary landfill) within 1 month after removal of the drilling rig. All garbage and debris left on the site shall be buried at least 3 feet deep, and metal containers shall be crushed. The lessee shall comply with all State laws and regulations pertaining to the disposal of human waste.
17. During drilling operations, and after drilling operations if well is a producer, the wellsite shall be maintained and kept clean of all trash and debris which might detract from the surrounding environment.
18. In the event the oil or gas test results in a dry hole or the well is abandoned, the drill pad and access road shall be ripped a minimum of 12 inches in depth. All ripped surfaces shall be protected from vehicular travel by construction of a dead-end ditch and earthen barricade at the entrance to these ripped areas.
19. All above-ground structures, not subject to applicable safety requirements, shall be painted to blend with the natural surroundings. The paint used shall be lusterless, nonreflective, flat, or semigloss color that simulates Federal Standard No. 595A, color 30318 or 36357.
20. If well is a producer, all roads shall be adequately drained to control runoff and soil erosion. Drainage facilities may include ditches, water bars, culverts, and/or any other measures deemed necessary by the Service representative. The following is a general guide for the spacing of water bars:

<u>Present Slope</u>	
less than 2 percent	200 feet
2 to 4 percent	100 feet
4 to 5 percent	75 feet
more than 5 percent	50 feet
21. Lessee shall provide the dirt contractor with a copy of the above stipulations prior to construction of the road, pad, or associated developments.
