9. No abnormal pressures or temperatures are expected to be encountered. Potential hazards such as hydrogen sulfide gas are not expected but adequate equipment will be provided by the drilling contractor should it be necessary.
10. The anticipated starting date of this operation is as soon as possible upon approval of the request and the operation should be completed 15 days after commencement of drilling.

Should any other information be required, we will supply it on request.

Yours truly,

MEADCO PROPERTIES, LTD.
