

- B. Unguarded pits, if any, containing fluids will be fenced until they have been filled.
- C. If the proposed well is non-productive, all rehabilitation and/or vegetation requirements of the Bureau of Land Management and the United States Geological Survey will be complied with and will be accomplished as expeditiously as possible. All pits will be filled and leveled within 90 days after abandonment.

11. TOPOGRAPHY.

- A. The wellsite and access route are located in a relatively flat area.
- B. The topsoil at the wellsite is moderately soft sand.
- C. The vegetation cover at the wellsite is moderately sparse, consisting primarily of prairie grass, some yucca and cacti, and miscellaneous weeds. No wildlife was observed, but it is likely that typical semi-arid desert wildlife inhabit the area. The area is used for cattle grazing.
- D. There are no ponds, lakes, streams or rivers within several miles of the wellsite.
- E. There are not occupied dwellings in the vicinity of the location. The nearest windmills are located about two miles south and two miles east of the wellsite.
- F. The wellsite is located on federal surface.
- G. There is no evidence of any archaeological, historical, or cultural sites in the vicinity of the location.

12. OPERATOR'S REPRESENTATIVE

- A. The field representative responsible for assuring compliance with the approved surface use plan is:

Don Cox
Drilling & Production Superintendent
1 Marienfeld Place
Suite 555
Midland, Texas 79701
