

TXO - CATCLAW ST. #2.
H-18-21-26, 9:00 am * 13 3/8" csg. 17 1/2" hole

1.) Bill Raby from Western Co. called & said he was to call the U.S.G.S on this well by toolpusher. Toolpusher is the only company man on loc. They set 520' of surface cmt'd. (w/ 600 5x5. circ 85 sxs. 2% cc 1/4" sk @ 60 ft.)

Bumped plug @ 7:00 am, parted csg. Didn't know exactly, thought @ bottom
Cement fell. SI csg. to keep cmt. from falling any further. Toolpusher suggested to Western Co. man about running 1" down bk. side to find TOC. Western Co. taking out 200 sxs. cl. c w/ 2 acf. Will keep us posted.

Inf. of psi test after do if they can get it circ. w/ 1" w/c, get back in & do.
