

Indicate formation tops in conformance with geographical section of state. The Division will accept only the true vertical depth of any newly-identified or previously identified formation top. The true vertical depth of any newly-identified formation top shall be measured directly from the surface of the land and shall be the depth of all reported tests completed, including intervals to the base of the formation. In the case of directionally drilled wells, true vertical depth shall also be reported for each zone. Items 1 through 14 shall be reported for each zone. The form is to be filled in quadruplicate except on state land, where duplicate only are required. (See form 1135.)
