If measured Ing pressure report to the	During gas-oil ratio test, each well shall be produced at a rate not exceeding the top unit ellowable for the pool in which well in located by more than 35 percent. Operator is encouraged to take advantage of this 25 percent tolerance in order that well can be assignation increased allowables when authorized by the Division. Gas volumes must be reported in MCF measured at a pressure base of 15.025 pela and a temperature of 60° F. Specific gravity base will be 0.60. Report casing pressure in lieu of tubing pressure for any well producing through casing. Mail original and one copy of this report to the district office of the New Mexico Oil Conservation Division in accordance with Bule 301 and appropriate pool rules.	
				on the official te	produced	punt of all	nn the eng	le greater in	No well will be socigned an allowable greater than the amount of all produced on the official test.	1
