This well was drilled to a depth of 7820' by Champion Petroleum Company as Well #1 Groom Federal during the period 11-16-83 to 12-8-83 and abandoned. The reserve pit and the western portion of the well pad were ripped before plans were made to re-enter this well to a depth of 6500'. Successor operator will re-construct the reserve pit and well pad. The access road is intact. No additional surface will be disturbed by the proposed re-entry operations. For archaeological or other pertinent information, please refer to original APD.
