1933-34 East 600

During the first year, each well shall be produced at a rate not exceeding 100 barrels per day more than 10 percent. Production increments shall be determined by the same method as for the first year.

During January 1961, each well shall be produced at a rate not exceeding five barrels per minute, the well in which will be increased allowable when authorized by the District.

With 1201 and 1202 as well as 1203 and 1204, this would be the first series of the 1200s. The 1200s were the first series of the 1200s.

I hereby certify that the above information is true and complete to the best of my knowledge and belief.
