No well will be assigned an allowable greater than 10% amount of oil produced on the official test.
During gas-oil ratio test, each well shall be produced at a rate not exceeding the test rate allowable for the pool in which it is located by more than 25 percent. Operator is encouraged to take advantage of this 25 percent tolerance in order that well can be brought increased allowable when authorized by the Division.
Gas volume must be reported in MCF measured at a pressure base of 15.025 psia and a temperature of 60° F. Specific gravity base will be 0.60.
Report testing pressure in flow of tubing pressure for any well producing through an IAB.
Mail original and one copy of this report to the district office of the New Mexico Oil Conservation Division in accordance with Rule 301 and appropriate pool rules.

I hereby certify that the above information is true and complete to the best of my knowledge and belief.
