Subject: Disposition of Casinghead Gas  
Burton Flat Deep Unit Well No. 37  
2Q 21S-27E  
Eddy County, New Mexico

Dear Mr. Williams:

In response to your letter of May 2nd concerning the disposition of casinghead gas from the above captioned well, produced gas is being sold to Phillips Pipeline. The well was connected to Phillips sales line in the first week of May, 1985.

This well has been a very low volume gas producer. Most produced gas is used to run the heater treater and pumping unit. Previous to gas connection, excess casinghead gas was vented, but it was a low volume. As a matter of fact, when Phillips connected their sales meter, the gas volume was too small to measure.

Sincerely,

  
D. E. Brown  
Regional Production Manager
