13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the final site is ready for final inspection.)

Please delete the paragraph titled "Indian Hills Unit #6 Facility" on page 6 of the original commingle agreement and delete Exhibit #12, schematic diagram of this facility. This well has been recompleat in the Upper Penn and the production is now gathered at the Station 120 Satellite Facility. The gas, liquid hydrocarbon and water production from this well are measured and transported in the same manner as the other wells gathered at this facility, (see section titled "Station 120 Satellite Facility" on page 4). I have attached an updated schematic diagram of this facility. The updated diagram is also being sent to the Carlsbad office of the BLM to be added to the Site Security Diagrams for this field.

ACCEPTED FOR RECORD

JUN 14 2002

ALEXIS C. SWOBODA  
PETROLEUM ENGINEER

14. I hereby certify that the foregoing is true and correct  
Name (Printed/Typed)
