Gentlemen, the state engineers office has taken a serious interest in this well. Location is 15-20S-29E and Siete is the operator. It appears to be a water supply well with 40,000 TDS and the Engineers office would like our opinion for the producing interval (1830 - 2567). Is this the Capitan Aquifer? Please contact Andy Core with the St. Engineers office at 505-827-3521.

Best to all hands. ROY
