1. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)\*

Yates Petroleum Corporation respectfully requests approval to keep this well in TA Status because it could have future potential as an Upper Penn producer or a salt water disposal well.

We are in the early stages of developing this lease and therefore desire to keep the well in TA Status in case it will be needed in the future.

The well has a CIBP set above the Upper Penn. We would anticipate scheduling a mechanical integrity test in October or November, 1994.

14. I hereby certify that the foregoing is true and correct
