

10. PLANS FOR RECLAMATION OF THE SURFACE

- A. Following completion of the drilling and testing program, all equipment not needed for operations will be removed. The pits will be filled and the location will be cleaned of all trash and garbage.
- B. Any unguarded pits containing fluid will be fenced until they are filled.
- C. After abandonment of the well, surface restoration will be in accordance with the requirements of the surface management agency. All pits will be filled and the location will be cleaned. The pit area, well pad and surface location will be ripped to promote revegetation.

11. SURFACE OWNERSHIP

United States Government
Bureau of Land Management
Carlsbad Resource Area
P.O. Box 1778
Carlsbad, New Mexico 88220
(505) 887-6544

12. OTHER INFORMATION

- A. Topography: The land surface has about 2° slope. The ground level elevation of the well site is 3987.8'.
- B. Soil: The soil consists of silt loams, silty clay loams and clay loams underlain by caliche.
- C. Ponds and streams: There are no rivers, streams, lakes or ponds in the area.
- D. Archaeological survey: An Archaeological survey was conducted on March 17, 1989. This clearance report is attached as Exhibit #5.
