

11. TOPOGRAPHY

- A. The wellsite and access route are located in a relatively flat area.
- B. The topsoil at the wellsite is moderately soft sand.
- C. The vegetation cover at the wellsite is moderately sparse, consisting primarily of prairie grass, some yucca and cacti and miscellaneous weeds. No wildlife was observed, but it is likely that typical semi-arid desert wildlife inhabit the area. The area is used for cattle grazing.
- D. There are no ponds, lakes, streams or rivers within several miles of the wellsite.
- E. There are no occupied dwellings in the vicinity of the location. The nearest windmills are located about two miles south and two miles east of the wellsite.
- F. The wellsite is located on federal surface.
- G. There is no evidence of any archaeological, historical, or cultural sites in the vicinity of the location.

12. OPERATORS REPRESENTATIVE

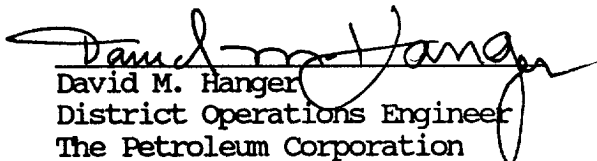

- A. The representative responsible for assuring compliance with the approved surface use plan is:

David Hanger
District Production Engineer
3131 Turtle Creek Blvd. Ste. 400
Dallas, Texas 75219-5415

13. CERTIFICATION

I hereby certify that I, or persons under my direct supervision, have inspected the proposed drillsite and access route; that I am familiar with the conditions which presently exist; that the statements made in this plan are to the best of my knowledge true and correct; and that the work associated with the operations proposed herein will be performed by The Petroleum Corporation and its contractors and subcontractors in conformity with this plan and the terms and conditions under which it is approved.
