

4. Location of Existing and Proposed Facilities

- A. Exhibit "C" is a map of the existing roads with the proposed well location.
- B. In the event of a producible gas well, gas separation facilities will be constructed on the location with gas metered at the wellhead and any condensate transferred to a tank on location. The gas will be piped to existing flowlines in a manner to be determined at a later date.

5. Location and Type of Water Supply

Water will be furnished and trucked by Contractor.

6. Source of Construction Materials

Caliche for surfacing the road and the pad will be obtained from the construction of the road and the pad.

7. Methods of Handling Waste Disposal

- A. Drill cuttings will be buried in a pit at the wellsite.
- B. Drilling fluids will be hauled away to an approved disposal well.
- C. No reserve pit for fluid circulation will be used in the drilling of this well. A dry discharge for cuttings and solids removal will be maintained from spud to TD.
- D. Water produced during tests will be hauled to an approved salt water disposal well.
- E. Current laws and regulations pertaining to the disposal of human waste will be complied with.
- F. Trash, waste paper, garbage and junk will be stored in a receptacle at location.
- G. All trash and debris will be removed from the wellsite within 30 days after finishing drilling and completion operations.

8. Ancillary Facilities

None required.

9. Wellsite Layout

Exhibit "E" shows the relative location of the rig components and reserve pits.

10. Plans for Restoration of Surface

- A. After finishing drilling and completion operations all equipment and other materials not necessary for operations will be removed. The location will be cleaned of all trash and debris to leave the wellsite in an aesthetically pleasing condition as is possible.
- B. After abandonment of well, equipment will be removed, the location will be cleaned, and the pad and access road will be ripped and returned to as near the original appearance as is possible.
- C. Wellsite is on land owned by the Federal Government.
