

The diagram illustrates a control system for a vehicle, labeled 10. A power source, represented by a battery symbol and labeled 8, is connected to a control unit, labeled 9. The control unit 9 is connected to a station, labeled 210, which is part of the vehicle 10. The station 210 has multiple outputs, labeled 1, 5, and 31, which are connected to various components of the vehicle. The output 1 is connected to a component labeled 1, which is a light or indicator. The output 5 is connected to a component labeled 5, which is a light or indicator. The output 31 is connected to a component labeled 31, which is a light or indicator. The diagram shows the electrical connections between the power source, the control unit, and the various components of the vehicle.
