

SURFACE USE PLAN  
Strata Production Company  
AGUILA FEDERAL  
990' FNL & 2080' FWL, Section 4, T-20-S, R-28-E  
Eddy County, New Mexico

1. Existing Roads - Area map, Exhibit "A", is a reproduction of the U.S.G.S. New Mexico 15 minutes quadrangle. Existing and proposed roads are shown on the exhibit. All roads shall be maintained in a condition equal that which existed prior to the start of construction.

- A. Exhibit "A" shows the proposed development well site as staked.
- B. From Artesia, New Mexico, the well is located approximately 15 miles to the South East off of the Illinois Camp road.

2. PLANNED ACCESS ROADS: No new road will be constructed. The well bore is staked 25' south of an existing oilfield road.

- A. The location will be built immediately adjacent to the existing road. See Exhibit "A".
- B. Gradient on all roads will be less than 5.00%
- C. No turnouts will be necessary.
- D. If needed, road across pad will be surfaced with a minimum of 4" of caliche. This material will be obtained from a local source.
- E. Centerline for the new location has been flagged. Earthwork will be as required by field conditions.
- F. Culverts in the access road will not be used. Any roads will be constructed to utilize low water crossing for drainage as required by the topography.
