

**SURFACE USE PROGRAM
MW PETROLEUM CORPORATION
HOC FEDERAL GAS COM NO. 2
SEC. 13, T22S, R23E
EDDY COUNTY, NEW MEXICO**

1) Existing Roads

- A) Exhibit "A" is a portion of the USGS Topographic Martha Creek, Quadrangle (7.5 minute series) map of the area showing the location of the proposed wellsite and roads in the vicinity.
- B) Directions: From Carlsbad, New Mexico, travel 11.7 miles North on Highway 285 to Highway 137. Turn left, travel 14.6 miles Southwest on Highway 137 to existing lease road. Turn right, travel 0.2 miles on caliche road to existing pad (HOC Federal Gas Com. No. 1). Travel 0.4 miles Northwest off of existing pad to wellsite. See Exhibit "B".

2) Planned Access Roads:

- A) Approximately 2062 ft. of new access road will be constructed from the existing HOC Federal Gas Com. No. 1 pad to the edge of the drilling mat. (See Exhibit "C"). The road will be 12' wide and constructed by grading and topping with 6" caliche watered and compacted. A 10' x 100' turn around will be constructed approximately 1100' from the wellsite. Water diversions will be constructed for proper road drainage.

3) Location of Existing Wells:

- A) All existing wells within a one mile radius are shown on Exhibit "D".

4) Location of Existing and Proposed Facilities:

- A) If the well is a producer, the production facilities will be installed on the existing drilling pad. Exhibit "F" illustrates the proposed onsite surface facilities.
- B) Surface facilities located at the HOC Federal Gas Com No. 1 location will be removed and the land restored to BLM standards.

5) Location and Type of Water Supply:

- A) Fresh water will be purchased locally from a private source and trucked over the access roads by a commercial hauler.
