

MULTI-POINT SURFACE USE & OPERATIONS PLAN

BTA Oil Producers

Indian, 9201 JV-P, Well No. 1
1650' FNL & 1650' FEL
Sec. 20, T22S, R23E
Eddy County, New Mexico

This plan is submitted with Form 3160-3, Application for Permit to Drill, covering the referenced well. The plan describes the location of the proposed well, the proposed construction activities and operations plan, the magnitude of necessary surface disturbance, and the procedures to be followed in rehabilitating the surface after completion of the operation so that complete appraisal can be made concerning the environmental effects associated with the operations.

1. Existing Roads

- A. Exhibit -A- is a topographic map showing the location of the proposed well as staked with existing roads and conditions within the one mile area. The proposed location is approximately 32 miles west from Carlsbad, New Mexico as shown on Exhibit -B-.
- B. From Carlsbad go northwest on Hwy 285 for 12 miles to State Hwy 137. Turn left and go south for 18 miles to a sign on the right, Queens Road and H-Y Ranch. Go right through the cattle guard and go for two and one-half miles to the west on caliche road. Continue on north 1.8 miles then east on flagged access road to the drillsite as shown on Exhibits -B- and -D-.

2. Access Road

- A. Our proposed access road will be 514 feet east from the existing Boles Ranch road.
- B. Caliche will be used for the access road; watered, compacted and graded.
- C. The access road will be crowned for drainage and maintained during drilling operations and, if productive, as long as producing.

3. Location of Existing Wells

- A. All existing wells within a one mile radius of our proposed well are shown on Exhibit -C-.
