13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)\*

It was our original understanding that four strings of casing would be required for this well. After further investigation, it was determined that if there is no salt section at this location, the well could be cased with three strings. Therefore, we propose to begin with a three-string plan designed such that we can go to four strings if the salt section is encountered.
