Vision Energy, Inc. State # 2 Surface Use and Operating Plan PAGE # 2

- D. The proposed access road as shown in Exhibit #3 has been staked as proposed lease road.
- 3. Location of Existing and/or Proposed Facilities:
  - A. Vision Energy, Inc. has two producing wells on this lease.
  - B. If the well is productive contemplated Facilities are as follows.
  - (1) <u>Any Producing Formation</u>: Production facilities are as shown in Exhibit #5B and will be located on the drilling pad.
  - (2) The tank battery and facilities including all flowlines and piping will be installed according to API specifications.
  - (3) Any additional caliche which is required for firewalls, etc. will be obtained from an approved pit.
  - (4) No power will be needed if the well is productive. Should the well have to be pumped a gas engine will be used.
- C. If the well is productive, rehabilitation plans are as follows:
  - (1) The reserve pit will be pushed into the excavated caliche area, after the contents of the pit are dry ( within 120 days after completion).
  - (2) Caliche from the unused portions of the drill pad will be removed. Top soil removed from the drill site will be used to recontour the pit area and any unused portions of the drill pad to the original natural level, as nearly as possible, and reseed as per BLM specifications.
