Bass Enterprises Production Company requests approval to temporarily abandon the referenced well. The well is currently being evaluated for possible completion as a water injection well. A CIBP will be set at 6,920' (50' above top perf) and capped with 35' of Class C cement. All tubulars will be left in the hole. The casing will be circulated with packer fluid and a mechanical integrity test will be performed with a BLM representative being informed 24 hrs prior to testing.

Work is expected to begin soon after approval.
