(Note: Report results of multiple completion on Well Completion or Recompletion Report and Log form.)

13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

Yates Petroleum Corporation wishes to amend the surface use plan to add a 3 phase raptor proof powerline and a 3" steel (buried or surface) flowline which will follow the existing road and an existing gas line to our Hickory Battery located in the same section. (on plat attached) Route will be approximately 1500' in length and 50' wide to accomodate both right-of-ways. The archeological services have been done by Pecos on their report 93155 and New Mexico Arch survey #93-NMAS-22-M. The pipeline which will be followed is NM-90430 and NM-90431.

14. I hereby certify that the foregoing is true and correct
