13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed and the operator has determined that the final site is ready for final inspection.)

Purpose of this filing is to advise that CIBP @ 7564' was milled out and that this well has been returned to production.

Proposal: Installation of poly and steel lines extending from the Bright Federal #1 to the Bright Federal #2. We recently obtained BLM approval to performed well work which made it possible to return the Bright Federal #2 to production.

Our proposal was to knock out a CIBP located at 7564'. This work has been completed and the latest well test reflects gas production of 70 mcf/d and we anticipate this volume will continue to improve as the formation is dewatered. In order to market this gas, it is necessary for us to install poly and steel lines which will make it possible for us to sell this gas through our existing facilities at the Bright Federal #1. Kerr-McGee hereby requests BLM approval for the following installation:

1. One 4" steel line to be used as a low pressure gas suction line.
2. One 4" poly line to be used as a low pressure water transportation line.
3. One 2" poly line to be used as a low pressure condensate line.

All three lines will be installed adjacent to the existing ROW and no more than 125' of pressure will exist in any of these line. Furthermore, if approved, the draw will be crossed via suspension stations.

14. I hereby certify that the foregoing is true and correct
