RE: Exemption From Annual Shut-In Pressure Test Requirement
Bright Federal Com #2
1650 FNL & 1650 FWL
UL-F, Section 21-T21S-R23E
API 30-015-28556

Dear Sir or Madam:

Please accept this request for exemption from OCD Rule 402, requiring an annual shut-in pressure test on natural gas wells. The subject well produces a substantial amount of water, and it is aided by artificial lift. When shut-in, a fluid level will rise in the wellbore and when returned to production, normal gas production is delayed until the well is once again stabilized.

Thank you very much for your attention to this request.

Sincerely,

Beverly Hoffman
