13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

Read & Stevens disposes of produced water from the Nix lease into the Nix Federal #5 SWD under administrative order SWD-752. In that order, wellhead pressure while injecting water is limited to no more than 521 psi. On September 10, 1999 Homes Wireline Service was rigged up on the SWD well to run a step rate test. Results of the test showed fractured initiation taking place at 1,010 psi wellhead pressure at a rate in excess of 1,500 BWPD. Read & Stevens, therefore requests an increase in the pressure allowable on the subject well to 900 psi.
