13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

As required by CFR 3162.7-3 and Onshore Oil and Gas Order No. 5, we are requesting approval of off-lease sales and commingling of gas.

Gas production from this well is measured at the wellhead, transported via pipeline to the suction line of the compressor located at UL "M", Section 10, T-21-S, R-23-E, Eddy County, NM. After compression, the gas is metered again and transported to the Indian Basin Gas Plant. After processing, the gas and NGLs will be metered at the tail-gate of the plant and sold. The production will be allocated to this well based on the meter reading and using previously approved methods of lease allocation.
