13. Describe Proposed or Completed Operations (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplete horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

Bonneville Fuels proposes to downhole commingle the Avalon Upper Penn Pool (9336'-9546' OA) with the Avalon Morrow Pool (10743'-10848' OA) and the West Burton Flat Strawn Pool (9725'-9952'). The Morrow/Strawn are currently isolate below a packer at 9627' and are producing up the tubing. The Upper Penn is isolated above the packer and is producing up the annulus. A sliding sleeve valve located above the packer at 9586' will be opened to allow the Avalon Upper Penn perforations to flow up the tubing. Application has been made to the NM OCD office and State of New Mexico Commissioner of Public Lands for downhole commingling.
