13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

Devon Energy Corporation (Nevada) requests permission to increase the setting depth of this well's 9 5/8" casing string from 1,200' to 1,700'. This increased depth will allow us to cover additional lost circulation zones that have been drilled through by other rigs operating in the area. It is also requested that the 13 3/8" surface casing string approved in the APD to be set at 450' be deleted from the casing design. The deletion of the 450' surface casing string should not have any adverse affects on ground water and will speed up the drilling process. Cement will be brought to surface on the 9 5/8" string.

14. I hereby certify that the foregoing is true and correct
