Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work) SEE RULE 1103.

After observing the offsetting operation that is currently in progress, Mewbourne Oil Company would like to change our casing program for this well. We had planed to drill a 7 7/8" hole for production casing, however we feel at this time it would be more prudent to drill a 8 3/4" hole. There is a Strong chance of taking a gas kick in the Atoka Formation and there is also a strong possibility of loss circulation in the Bonesprings Formation. So we would like to continue with the planned 12 1/4" hole (13 3/8" casing already set at 434') but set 9 5/8" 36# J55 ST&C to 2700'. Drill out with a 8 3/4" hole with the advantage of being able to set 7" below 8000'. This will cover the loss zone and enable us to build a mud weigh to over come the Atoka.

The OCD District Office was notified and verbal approval was give.

We would also like to take this opportunity to amend the well name to read Northeast Avalon Hills"36" State #1.
