Re: Lease: NM 3606 Well: Lake Shore Federal Com 10 #3  
Sec 10 T21S, R26E, Eddy County NM

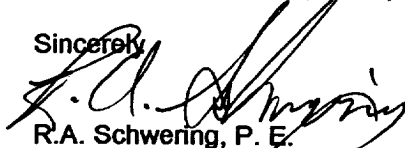

Dear Sirs,

Bonneville Fuels is requesting permission to test the above referenced well into the sales line. We expect a rate of 5000 mcf/d of the combined Upper & Lower Strawn formation. In order not to waste this gas by venting we would like to get the pipeline hooked up, we are currently waiting on a Right of Way from the Bureau of Reclamation. There is also a pending Communitization Agreement that should be complete in 30 days.

Enclosed you will find a Sundry Notice, reflecting the well status, a Sundry Notice reflecting the request to test into the sales line and a Well Completion Report. The Well Completion Report will be amended after the well has been tested into the sales line.

We appreciate any help in expediting this matter.

Sincerely,

  
R.A. Schwering, P. E.  
Operations Manager SE NM
