Consolidation

13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the final site is ready for final inspection.)

Kerr-McGee Oil & Gas is hereby requesting permission to move the separator, compressor, dehy, and sales meter from the Bogle Flats #20 to the Bogle Flats #11.

The increased operating pressure from the Indian Basin plant has required us to upgrade compression. The most cost effective way of accomplishing this is to consolidate compression and separation at one central facility which will be located at the Bogle Flats #11 well.

14. I hereby certify that the foregoing is true and correct
