13. Describe Proposed or Commenced Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplete horizontally, give subsurface locations and measured and true vertical depths of all pertinent markets and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a low interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the final site is ready for final inspection.)

Combine gas flow from West Indian Basin Unit #1Y and 5 with Bunnel Federal #2 at West Indian Basin Unit Gas Compression Facility at the West Indian Basin Unit #1Y location. This will lower overall compression costs and extend the economic life of all 3 wells, and lower air emissions. Each well will have its own electronic meter for gas measurement. All free liquids at the Bunnel Federal #2 will be metered on location and then trucked to the Marathon Plant. All free liquids at the WIBU #1Y and 5 will be metered separately. Water will be transferred to the Bunnel Federal 3 SWD and disposed. Condensate is not being produced with the liquid stream. Some is dumped from the compressor and will be hauled to the Marathon Plant for allocation. Gas transfer for all 3 wells will be at the WIBU #1Y location. Marathon Meter # 017119.
