13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

IHU Well No. 24 Flowlines

Marathon Oil Company proposes to install two flowlines for Indian Hills Unit Well No. 24. The proposed flowlines will be 4" Schedule 40, Grade B welded steel line pipe installed on the surface. They will transport produced fluids at rates of 3 MMCFPD, 20 BOPD and 3000 BWPD to production facility Station 128.

The well will be drilled directionally from the IHU 17 location. The flowlines will follow the route of the IHU 17 flowlines. The proposed route is on Fee surface as shown on the attached plat for a distance of 1175'. An archaeological survey for the route has been completed and is attached.

The anticipated life of the project is five to seven years. Due to the temporary nature of the project Marathon requests approval for surface installation.

14. I hereby certify that the foregoing is true and correct
