

SURFACE USE AND OPERATING PLAN

**Attached to Form 3160-3
Marbob Energy Corporation
Zebra "FF" Federal No. 1
1980' FNL and 1980' FWL
Section 7-21S-25E
Eddy County, New Mexico**

1. Existing Roads:

- A. The well site and elevation plat for the proposed well is attached. It was staked by John West Engineering.
- B. All roads to the location are shown in Exhibit #3. The existing roads are illustrated in red and are adequate for travel during drilling and production operations. Upgrading of the road prior to drilling will be done where necessary as determined during the onsite inspection.
- C. Directions to location: From Artesia, proceed south on U.S. 285 for 23 miles. Turn southwest on Queens Highway (state road 137) at mile marker 46 and proceed 3 miles. Turn west on lease road and proceed .3 miles. Turn on northwest road and proceed .1 miles. The access road is on the right.
- D. Routine grading and maintenance of existing roads will be conducted as necessary to maintain their condition as long as any operations continue on this lease.

2. Proposed Access Road:

A new access road of 474' will be necessary. The new road will be constructed as follows:

- A. The maximum width of the running surface will be 10'. The road will be crowned and ditched and constructed of 6" of rolled and compacted caliche. Ditches will be at 3:1 slope and 4 feet wide. Water will be diverted where necessary to avoid ponding, prevent erosion, maintain good drainage, and to be consistent with local drainage patterns. BLM may specify any additions or changes during the onsite inspection.
- B. The average grade will be less than 1%.
- C. No turnouts are planned.
