Sundry Notice of Amending the APD Drilling Program

04-12-2002

Page Two

(Continued from the front.)

The only "problem" we will have is rigging up the derrick. As you can see the vee-door side of location is 36' shorter than we normally build. This 36' is only used for maneuvering the truck dollied to the crown section. To set the derrick we will simply have to hold the crown section with two winch trucks at right angles to the derrick near the crown section. The location has ample room for this operation and safety will not be compromised as a result.

In order to provide additional room on the Right Hand Canyon 34 Federal #4 location some of the non-essential equipment will be placed on the Right Hand Canyon 34 Federal #2 location which is less than 1/4 mile to the southwest.
