**RECEIVED**  
OCT 17 1963

The elevation of the ground level ~~drill hole~~ above sea level is 5524 ft.

**DETAILS OF WORK**

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

This well was P & A by setting the following cement plugs:

30 ex 3650-3750'  
30 ex 2110-2210'  
30 ex 1250-1350'  
10 ex 10' - 43' (Top of surface pipe)

8-5/8" surface casing was set at 1284' & cemented to surface. This casing was left intact. 9.0#/gal gel mud was left between all cement plugs. The location has been cleared and drilling pits back filled. A dry hole marker was installed.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
