(Field)**Elly**
(County or Subdivision)**New Mexico**
(State or Territory)The elevation of the derrick floor above sea level is **5709** ft. **S.F.**

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Well plugged and abandoned on January 19, 1954.

Spotted 30 in. cement plugs at the following intervals:
6150-6250'; 1450-1550'; 850-950'.

Top of well capped with a steel plate.

There was no casing recovered from well as it is to be used as a water well by Dr. C. L. Wenzel, Carlsbad, New Mexico.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
