Eddy
(County or Subdivision)

New Mexico
(State or Territory)

The elevation of the derrick floor above sea level is ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

It is our intention to drill a well to about 1900 feet to test the Delaware producing formation in this area.

We will run about 475 feet of 8 5/8 inch casing to shut-off water, and then we will drill to the pay, if oil is encountered 7 inch casing will be cemented with 250 sacks and the 8 inch will be pulled.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.

Company Harvey L. Yates

Address 314 Becker Bldg.,
Artesia, New Mexico
