DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate muddling jobs, cementing points, and all other important proposed work)

Contract depth 2000 feet. To test the Delaware Sand estimated between 1750 and 1850 feet. Will set 10½ inch casing to shut-off surface water estimated between 200 and 250 feet. If necessary will set 1000 feet of 8 5/8ths, 28 lbs. as an intermediate string to shut off any water or cavings which might impede normal drilling conditions. Will set and cement between 1725 and 1825 feet of 5½ inch casing, 17 lbs., as the oil string if the well makes a producer.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
