DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We propose to drill with cable tool to 250 feet to test the below sandstone. If fresh water is encountered we will contact the USGS at Artesia for instructions for water shut-off. If oil or gas production is encountered we propose to set 5 1/2" casing on the indicated day.
