Re: Crawford Lease,
Crawford (Penn) Field,
Eddy County, New Mexico

Dear Mr. Utz:

The productivity of Union's Crawford No. 1-26 Well, Crawford (Penn) Field, Eddy County, New Mexico, has declined and we are having difficulty in flowing against Transwestern's line pressure. To evaluate a potential compressor installation, permission is requested to test this well for deliverability by flaring to the atmosphere. We anticipate flaring less than 2 MMSCF of gas.

During June, 1967, this well delivered 2.6 MMSCF of gas while an offset well delivered 21 MMSCF to Transwestern.

Very truly yours,

Original Signed
G. W. Coombes
