Re: Cass Draw Delaware  
Pardue 1-M, Eddy County, New Mexico

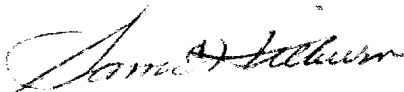

Gentlemen:

HMH Operators, as independent operators of the captioned well, has given notice to the working interest owners that it will terminate its operation of this well on June 8, 1969, being 30 days from the date of this letter. HMH Operators has recommended to the working interest owners that this well be plugged since hauling the water necessitated by the no pit order, will make production from this well uneconomical.

Attached hereto is a list of the working interest owners who, we assume, will either agree to the plugging of the well, or will appoint another operator within the next 30 days.

Yours very truly,

HMH OPERATORS
