Re: Plugging: Cabeen Exploration
Corp. Crawford # 1-R, Sec. 9-
24S-27E, Eddy County, New Mexico.

Dear Mr. McCully:

We are herewith returning your recently submitted Form C-103, "Notice of Intention to Plug" for the subject well in order to obtain the following information and revisions. We need to know how much pipe will be left in the hole. The form should also show that mud is to be placed between the cement plugs. Further, if any of the pipe remaining in the hole is perforated, cement should be spotted across the perforations. A cement plug should be placed across the top of the Ramsey sandstone and a plug should be spotted at total depth.

If you have any questions concerning this matter do not hesitate to call on me.

Very truly yours,

OIL CONSERVATION COMMISSION
