

OIL CONSERVATION COMMISSION

Santa Fe, New Mexico

MISCELLANEOUS REPORTS ON WELLS

Submit this report in triplicate to the Oil Conservation Commission or its proper agent within ten days after the work specified is completed. It should be signed and sworn to before a notary public for reports on beginning drilling operations, results of shooting well, results of test of casing shut off, result of plugging of well, and other important operations, even though the work was witnessed by an agent of the Commission. Reports on minor operations need not be signed and sworn to before a notary public. See additional instructions in the Rules and Regulations of the Commission.

Indicate nature of report by checking below.

The first part of the document discusses the importance of maintaining accurate records of all transactions. It emphasizes that proper record-keeping is essential for the company's financial health and for providing reliable information to stakeholders. The document outlines the various methods used to collect and analyze data, including interviews, surveys, and focus groups. It also describes the challenges faced during the data collection process and the steps taken to overcome them. The second part of the document presents the findings of the study. It shows that there is a significant correlation between the variables studied, and that the results are consistent with previous research. The document also discusses the implications of the findings for the company and for the industry as a whole. Finally, the document provides recommendations for future research and for the company's operations. It suggests that further studies should be conducted to explore the relationship between the variables in more detail, and that the company should implement the recommendations to improve its performance.
