December 26, 1958

Well No. 1 is located 100 ft. from N line and 33 ft. from E line of sec. 19

19 (1/4 Sec. and Sec. No.) 24S (Twp.) 20E (Range) N.M.P.M. (Meridian)

Malaga (Field) Eddy (County or Subdivision) New Mexico (State or Territory)

The elevation of the derrick floor above sea level is 2991 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Verbal authority to plug and abandon was received by long distance telephone from Mr. Bob Evans on December 18, 1958. On December 19, 1958, a 15 sack cement plug was spotted from total depth to 2730. The 5 1/2" casing was pulled from 2400 and 20 sack of cement was spotted from 396" to 335". A 10 sack cement plug was placed in the top of surface pipe and the required marker erected. The location was cleaned up and the pits back filled on December 23, 1958.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
