Wright-Federal  
Well No. 1 is located 1980 ft. from [S] line and 660 ft. from [W] line of sec. 27  
NW/4 SW/4 Sec. 27 23 south 31 East N.M.P.M.  
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)  
Wildcat Eddy New Mexico  
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is \_\_\_\_\_ ft.

## DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

The objective of this test is to test the Bell Canyon section of the Delaware series to about 4400'. Seven inch 20# surface casing will be set about 300' below ground level with cement circulated to surface. Water will be used as drilling fluid to 4100' and then will mud up with a salt base mud. If production is indicated 4-1/2" 9.5# casing will be run and cemented, if necessary will acidize and fracture any prospective pay zone. If well is plugged, cement plugs will be spotted in all water sections, as per instructions.
