Re: Plugging J. A. Leonard # 1,  
Continental State, NW NW of  
Sec. 33-23S-31E

Dear Sirs:

We are in receipt of your letter dated February 21, 1961.

You assure the Commission therein that the AEC will perform "the additional plugging required" on the subject well at such time as your instrumenting of subject well will permit. This will notify you that the assurance is acceptable to this office. The operator will be released from further responsibility when he has completed plugging the well back to the base of the salt, and cleans the location to the satisfaction of the Commission.

Enclosed please find a copy of the proposed plugging program on the subject well.

Very truly yours,

OIL CONSERVATION COMMISSION

WAG/sa  
Encl:

W. A. Gressett  
Oil and Gas Inspector

CC: Mr. A. L. Porter, Jr.

"But, if you're" let's not forget to get on it now all

For release the Commission believes that the AEC will perform the additional planning required on the subject well at that time as your instrumenting of subject will permit. This will permit your staff the security of acceptable to your office. The subject will be released from further responsibility when he has completed planning the work to be done at the base of the sale, and clear the work of the Commission.

Enclosed please find a copy of the proposed building program on the  
 subject.
